What is different about Caisley™ tags?

Key features that determine tag retention:

1 Design of the applicator

- ✓ Straight-line action drives male & female precisely together
- ✓ No damage to locking mechanism or electronic (EID) transponder
- ✓ Minimises ear tissue & animal trauma

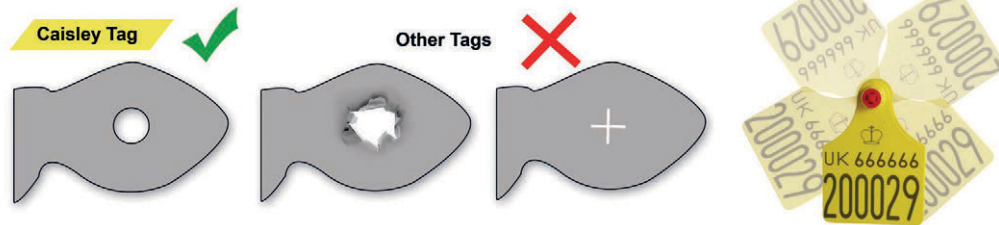

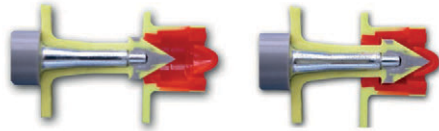

2 Tag raw materials

- ✓ Formulation using blend of premium quality plastic ingredients
- ✓ No recycled materials used
- ✓ High elasticity & tensile strength allows tag to be released when snagged

3 Design of male & female locking mechanism

- ✓ Hardened glass-fibre inserts in male & female punch a clean hole in the ear-tissue

- ✓ Cleanly punched hole in the ear-tissue allows free and frictionless tag rotation throughout the lifetime of the animal
